“Overview of Russia’s Industrial Parks 2019” is the sixth issue on the results of the exclusive comprehensive analysis of the current development status of Russian industrial parks and special economic zones of industrial and production purposes. The Overview provides the key data on the establishment and development dynamics of organised industrial areas designed to accommodate production facilities of different industries. Aside from the industry statistics, the Overview contains detailed profiles of all industrial parks and SEZ that fully or partly comply with the requirements of the National Standard “Industrial Parks. Requirements.”

The publication is intended for general audience. It will be particularly useful to representatives of investment companies planning to establish their own production facilities in Russia, representatives of industrial parks and special economic zones, public officials at the national and local levels, representatives and employees of Federal and regional development institutions, credit, finance and investment institutions, branch and business associations. The Review was prepared on the basis of statistical data relevant to January 1, 2019.

Dear Readers!

On behalf of the Association of Industrial Parks of Russia, we are pleased to present to you the sixth issue of the annual industrial Overview "Industrial Parks of Russia - 2019". What you see is the country's only printed publication that contains objective and comprehensive year-by-year information on all industrial parks, including industrial special economic zones (SEZ).

The publication is a non-commercial product. Regardless of their membership in the Association, the Overview includes information on all industrial parks that have promptly provided information and, as per AIP expert assessment, meet the National Standard GOST R Industrial parks. Requirements. We, therefore, maintain analytical objectivity and create attractiveness for potential investors and external audiences.

However, only AIP members and AIP-certified industrial parks possess a privilege of having their own profiles on the Overview pages. Information on industrial parks that have not joined the AIP of Russia is taken into account in statistics and published on a list.

The first issue was published in 2013, and since then we have carried on the tradition of regularly publishing the industry growth analysis, attaching the catalogue of all industrial parks.

It is for the first time that the new issue you are now holding contains statistical and comparative indicators taking into account the comprehensive 2018 data, and the accumulated total for the entire period in regional and macroeconomic contexts.

The issue's main conclusion is that industrial parks have retained their leadership in growth rates among all other types of infrastructure and commercial real estate. Even in the context of low investment activity globally (particularly so in Russia), the number of parks increased over the year by 37% (61% in physical terms) to amount to 227 sites located in 60 regions. Noteworthy is that, as of year-end 2018, 150 sites have the status of operating industrial parks, which is 39 parks more than in the previous year.

The geography of "industrial park movement" is also expanding: according to 2018 data, it already covers 60 regions of Russia - the RF constituent entities where industrial parks recognized by the Association of Industrial Parks of Russia are operating or under intensive construction. This clearly suggests the format consistency and the industry's maturity, because a couple of years ago only some 40 regions could boast of industrial parks, and even fewer regions had operating parks.

Thus, the industrial segment of real estate is growing faster than others, clearly above the market and even aggressively, which does not reflect the general economic state. Obviously, the growth is situational, and experts argue about the causes and prospects. One can only speculate on how long the explosive growth will last. In our opinion, about 600 industrial parks (including small parks and large SEZs) will be necessary, considering growth plans, to fully meet the needs of the Russian industry. At this point, our industry will move to a static state of sustainable "horizontal" development. According to the current dynamics, it will take another 5-6 years to achieve these indicators. Although in reality, the dynamics are sure to slow down and the process will stretch out for a decade. We therefore predict the peak of building new parks to be over by 2023.

The reasons for the outstripping growth of industrial parks seem more apparent. The most important one is the novelty of the format. Ten years ago it was not common in Russia, except for singular examples that actually founded the industry. Investors had to go to the "open fields" objectively risking and tackling unusual tasks that involved connection and construction, or to "negotiate" with the owners of vacant production assets that sometimes proved technically unsuitable. Industrial parks, as a type of economic activity, offered a novel format for convenient and professional production location, to which the market responded by high demand from investors. There are already 8 roubles of direct investment in production per rouble invested in the construction of industrial parks. Incidentally, as of full year-end 2018, this figure is 15% higher than last year's results and will inevitably continue to grow in the future until all sites are completely filled.

The boom also stemmed from state support in the form of subsidies to build and renovate industrial parks and compensate for previously incurred costs. Every year, the state invests over RUB6 billion in these goals from the federal budget alone, extending support to 20 to 30 industrial parks. The RF constituent subjects' budgets and the corporate segment are also critical sources of funding for industrial parks. Directly or indirectly, the state participation in financing the building of industrial parks can be assessed as exceeding a half, although the number of management companies of private industrial parks (144) is almost double the number of state-owned companies. This factor also works in favour of the format's attractiveness for investors, since rendering services of production placement and maintenance of utilities is a function more peculiar to business. As to state support, it played its role exactly from the infrastructure funding perspective, allowing the continued inflow of investment from our key target audience, i.e. new industrial plants.

This issue is where we first present an analysis of investment in industrial parks by country of origin and sector profile, and analyse investment distribution by region.

The year 2018 exceeded, in part, the expectations of experts and showed the acceleration of investment growth with respect to some indicators, such as the number of new residents in industrial parks, their area in hectares and square meters of production space. In money terms, the volume of investments by residents of industrial parks has slightly declined versus the previous year, but the recovery trend after the 2014 failure continues.

All the country's industrial parks attracted a total of RUB1.2 trillion of direct investment in establishing new industries, namely, 2882 plants now located in the country's industrial parks.

As of year-end 2018, it was for the first time in the history of industrial parks that their occupancy rate rose beyond the half and approached 60%.

Nevertheless, the main question on the agenda of each industrial park is whether there is a potential for attracting new residents. And if there is, what are the attraction sources? Our experience of working with investors and localising production in Russia suggest that companies' interest is shifting from searching for sites with prepared infrastructure to a more complex range of services, searching for reliable suppliers of feedstock and component parts, and finding partners ready to support the presence in new local markets. We are convinced, therefore, that our future success depends on quality upgrading, extending the list of industrial park services as compared to other sites and switching to a service model of dealing with investors.

We hope this material would be useful for you!

Composite Authors of the AIP of Russia

About the Association of Industrial Parks of Russia (AIP)

ASSOCIATION OF INDUSTRIAL PARKS OF RUSSIA (AIP OF RUSSIA)

— a nonprofit industry membership organisation. Established in 2010, the AIP of Russia already unites about 150 legal entities from 48 regions, which are mainly management companies of industrial parks and SEZ, as well as regional development corporations, investment agencies and service companies in the areas of design, construction and operation of industrial facilities.

Association's key activities

ATTRACTING INVESTORS

The Association of Industrial Parks of Russia is focused on attracting investors through collective promotion of the AIP members under the Industrial Parks of Russia brand.

One of the effective tools for working with investors is a free service of selecting production location sites, which dozens of foreign and Russian companies have already taken advantage of. All applications for selecting a production site (and sometimes suppliers and contractors) are sent directly to the Association members and normally include an investor's direct contacts. They are available in the Personal Account at www.indparks.ru. The AIP members can at any time turn to requests and track their current status.

The AIP annually expands its network of partners abroad and collaborates with them in holding regular investment arrangements.

EXPERT REVIEW AND EXPERIENCE EXCHANGE

The AIP of Russia places special emphasis on organising interaction among its members. One of the popular formats of the Association's events is familiarization tours to industrial parks arranged for management companies' staff to get acquainted with experience and practices of developing parks in other regions and to share views with their "brothers in trade".

CERTIFICATION OF INDUSTRIAL PARKS

As a developer and holder of the National Standard "Industrial Parks. Requirements", the AIP has been the only certification body for industrial parks since 2015. To date, 36 parks have been certified and entered in the certified parks register under a decision of the Certification Committee composed of leading industry experts.

The National Standard developed by the AIP jointly with the Ministry of Industry and Trade (Minpromtorg) of Russia was used to form the basis for regulatory documents of the Russian Government, including its Resolution "On industrial parks and management companies of industrial parks" No. 794 dated 04.08.2015. The Minpromtorg of Russia conducts accreditation for compliance with this document.

WORKING WITH REGULATORY FRAMEWORK

Most of laws and regulations governing the construction and operation of industrial parks in this country were made at the initiative and/or with the participation of the AIP of Russia. Representing the consolidated position of the industry, the Association fosters continued dialogue with public authorities concerning the issues of improving laws on industrial parks, industrial construction, land relations and power engineering.

INDUSTRY EVENTS AND ANALYTICS

The Association's main tools are professional analytics and industry events.

All publications of the AIP of Russia are posted on the Association's website and are fully available in the Personal Account of the Association members.

Every year, the AIP of Russia holds more than 20 event, most of which are free of charge for the Association members. The events plan is prepared annually, and each member of the AIP of Russia can have its own proposals included in it.

STATE SUPPORT

The AIP members represented by the Association are in a continued dialogue with key ministries on the issues of regulatory control and support measures for industrial parks. This allows business and government to work out joint decisions on a continuous basis.

There are 3 tools at the federal level to encourage capital investment:

- a subsidy to build and develop industrial parks as part of the National Project "SME and Support for Individual Entrepreneurial Initiatives" (Ministry of Economic Development of Russia);
- compensation for costs related to building the infrastructure of industrial parks as part of RF Government's Regulation No. 1119, dated 30.10.2014 (Ministry of Industry and Trade of Russia, Ministry of Finance of Russia);
- subsidising the interest rate on loans for building industrial parks as part of RF Government's Regulation No. 831, dated 11.08.2015 (Ministry of Industry and Trade of Russia).

AIP partners in Russia

Since 2013, the Association has been actively cooperating with the Ministry of Industry and Trade of the Russian Federation in developing and improving the regulatory framework for industrial parks.

AIP Executive Director Denis Zhuravsky is a member of the Strategic Council for Investments in New Industries at the Ministry of Industry and Trade of the Russian Federation. The AIP representatives are members of the Interdepartmental Working Group set up to prepare proposals for improving operations in the field of industrial and technology parks and industrial clusters.

Since its inception, the Association of Industrial Parks has been actively cooperating with the Ministry of Economic Development of the Russian Federation in what concerns investor outreach and state support of industrial parks. The experts of the Association of Industrial Parks of Russia are members of expert groups and committees at the Ministry of Economic Development of the Russian Federation.

Also, under the support of the Ministry and Trade Representations of the Russian Federation, AIP foreign business missions take place worldwide.

In July 2015, the Association of Industrial Parks and the Industry Development Fund signed a cooperation agreement. The Fund provides target loans of RUB50 to 700 million at a rate of 5% per annum for up to 7 years on a competitive basis, bolstering an inflow of direct investment in the real economy. Over a few years of operation, the Fund has funded 229 companies for a total amount of RUB56 billion at preferential rates (5% in roubles). Many projects are located in the industrial parks of Russia. One of the joint tasks is to improve the availability of the Fund's financial products for management companies and residents of industrial parks.

On 15 March 2016, the Fund and the AIP signed a cooperation agreement. The agreement purposes are to join the efforts of the AIP and the Fund in creating industrial parks in single-industry cities, and to collaborate in attracting investors to specially prepared sites in single-industry cities. The Association intends to participate in drafting project documentation for new industrial parks in single-industry cities. To achieve these goals, the Fund and the Association plan joint activities and the AIP experts' participation in working groups and advisory bodies of the Fund. In addition, the parties share guidance, in particular, information support for the AIP members to access the Fund's financial products.

On November 23, 2017, the Association of Industrial Parks of Russia and JSC Special Economic Zones entered into a formal Agreement on Cooperation. The Agreement calls for joint promotion of products and production placement proposals in the investment community of Russia and the world. JSC SEZ and the AIP take mutual part in each other's investment events and hold joint activities.

Management companies of industrial special economic zones are members of the AIP of Russia.

On August 28, 2018, the Russian Direct Investment Fund (RDIF) and the Association of Industrial Parks of Russia signed an Agreement on Cooperation in attracting foreign investment in the Russian regions, as well as in supporting and monitoring specific investment projects across the Russian regions. The primary objectives of cooperation are as follows: raising the RDIF partners' awareness of the possibilities for localising production in the industrial parks of Russia; raising awareness of foreign business communities of the possibility to co-invest with the RDIF; raising the Association members' awareness of the RDIF projects.

AIP of Russia's International partners

On March 01, 2016, in Tokyo, the Association of Industrial Parks of Russia and the Japanese Association for Trade with Russia and the New Independent States (ROTOBO) signed a Memorandum of Cooperation in assisting Russian-Japanese projects.

The Japan Association for Trade with Russia and the New Independent States (ROTOBO) was founded on January 16, 1967 (at that time – the Japan Association for Trade with the USSR and Eastern Europe). ROTOBO includes almost 200 organisations.

Since 2013, the AIP and ROTOBO have annually conducted business missions in Japan to attract investors.

Since 2015, Confindustria Russia has been a partner of the Association of Industrial Parks of Russia and, under the Agreements on Cooperation, has held joint events to promote information about industrial parks of Russia in the investment communities of Italy and the European Union.

Formed in the 1920s, Confindustria Italia (Confederation of Italian Industrialists) currently unites about 150,000 Italian companies. Confindustria Russia, a subsidiary of Confindustria Italia, represents its members with a turnover exceeding EUR160 billion.

AmCham unites over 500 member companies and represents the US business community in Russia to develop trade and economic relations and carry out joint investment projects. The cooperation aims at drawing attention of US companies to the services offered by the Association members, such as industrial parks, special economic zones, regional development corporations, consulting and other service companies.

The AIP of Russia represents its members in AmCham (American Chamber) and the US investment community under a cooperation agreement signed at the InRussia conference on November 23, 2017.

The Russian-German Chamber of Commerce representing mainly German companies in Russia is a foreign economic branch of the network of regional chambers of commerce and industry in Germany. In addition, the Russian Chamber of Commerce directly includes more than 800 member companies. Since 2013, the AIP and the Chamber of Commerce have jointly held annual investment forums in German cities.

On November 23, 2017, the Association of Industrial Parks and the Russian-German Chamber of Commerce held the jointly prepared conference "InRussia 2017: Production Localisation and Industrial Cooperation".

On June 06, 2018, the Association of Industrial Parks of Russia and the Chamber of Austrian Economy WKO signed an agreement in the presence of the heads of two states – President Vladimir Putin and Federal Chancellor of Austria Sebastian Kurtz.

The subject matter of the Agreement between the AIP and the Austrian Chamber of Commerce of WKO was attracting investments in industrial parks of Russia – assistance to Austrian companies implementing projects to locate production in the regions of Russia.

The Korean International Trade Association was founded in 1946 to promote the country's economic ties. Today, it is Korea's largest business association of 71,000 companies. Since 2016, the AIP and the KITA have held joint investment events. During INNOPROM 2017, the organisations signed a Memorandum of Cooperation in supporting and monitoring Russian-Korean investment projects. The AIP and the KITA cooperate to promote the Association members' interests in Korean business circles.

Founded in 1974, the Belgian-Luxembourg Chamber of Commerce is now one of the most influential bilateral chambers of commerce of Belgian businessmen with foreign countries. In March 2017, in Brussels, the Association of Industrial Parks and the Belgian-Luxembourg Chamber of Commerce signed a formal agreement on promoting their members' interests, including as regards a search for partners to implement joint investment projects in Russia.

The Belgian-Luxembourg Chamber of Commerce is a partner of the AIP in attracting and monitoring investment projects of the Belgian and Luxembourg business in Russia. The Belgium and Luxembourg business has to date built 54 factories in Russia.

ABOUT MEMBERSHIP

in the Association of Industrial Parks of Russia

SERVICES AND PRIVILEGES FOR AIP OF RUSSIA MEMBERS

DIRECT ACCESS TO REQUESTS FROM POTENTIAL INVESTORS/CUSTOMERS

Regardless of your activity during the year, our day-to-day efforts are aimed at drawing attention to the industrial park industry and receiving direct requests (for a site, suppliers and contractors) from companies planning to set up production in Russia.

The Association never acts as an agent or intermediary. Upon receiving a request for production placement, we immediately send it along with technical parameters directly and only to the Association members. In order to form a flow of requests in 2017, we announced a service, free for any industrial companies in Russia and beyond, for qualified selection of a site/suppliers/contractors to set up production in Russia.

We are currently working on a significant increase in the flow of requests through our partner network worldwide, holding events and various communication channels.

INFORMATION PRODUCTS AND EMAILING

Weekly Monitoring - Industrial Parks Industry News. Contains media publications on industrial parks, SEZ and production localisation. Emailed to all the Association members. The archive is available on the website during authorisation through the Personal Account.

Weekly Investment Monitoring. Contains all publicly announced investment plans and intentions of production companies for localisation in Russia, and, as far as possible, contact details of investment project initiators. Emailed to all the Association members. The archive is available on the website during authorisation through the Personal Account.

FREE PARTICIPATION IN AIP'S OWN EVENTS IN RUSSIA

Every year we hold about 20 our own events, in which the Association members can participate free of charge provided that they register before the announced deadlines. The events calendar has a planning horizon of one year and is regularly updated on the Association's website that also offers electronic registration. Partner events (which may be paid ones) always provide preferential participation terms for the Association members.

DISCOUNTED PARTICIPATION IN BUSINESS MISSIONS AND EDUCATIONAL PROGRAMS

For interested members of the Association, we arrange and conduct business missions to foreign countries in order to attract investors/clients. Training seminars or workshops can be organised by prior requests. Although we finance such events only at the participants' own expense and use no membership fees, the Association members always enjoy a discount and guaranteed priority participation.

RIGHT TO USE AIP OF RUSSIA CORPORATE IDENTITY

The AIP of Russia members are legally entitled to use the special sign "Member of the Association of Industrial Parks of Russia" in their promotional materials. The AIP of Russia logo is registered by the Federal Agency for Intellectual Property, Patents and Trademarks and the logo rights are protected under the applicable Russian laws.

The collective brand "Industrial Parks of Russia" is gaining recognition in the investment community of Russia and many other countries. This is an understandable tool with a positive reputation supported by hundreds of success stories.

GUIDANCE

The Association members can count on our guidance regarding industrial park concepts, partner search and interaction with authorities. Guidance includes individual consultations by our staff, as well as provision of methodological materials and our partners' contacts. Consultations can be held both in a face-to-face meeting at our office or by e-mail.

AIP OF RUSSIA PARTNER NETWORK

To promote the interests of our members, we are constantly extending our partner network in Russia and abroad. We are ready to arrange contacts and meetings with any of our members and/or partners for our members. The AIP's partners include the Ministry of Industry and Trade of the Russian Federation, the Ministry of Economic Development of the Russian Federation, the Industrial Development Fund, the Single-Industry Cities Development Fund, the Russian-German Chamber of Commerce, the Japanese Association for Trade with Russia and NIS (ROTOBO), the Chamber of Austrian Economy WKO, Confindustria Russia (Association of Italian Entrepreneurs) and others. A complete partners list describing cooperation can be found on the AIP Russia's website in the PARTNERS section.

PARTICIPATION IN THE ASSOCIATION'S WORKING

BODIES

The Association members may nominate candidates for the Association's governing bodies, committees and working groups.

The supreme governing body of the AIP of Russia is the General Meeting of the Association Members held at least once a year. The collegial executive body is the Board of the Association, which is formed by the General Assembly by direct election for a term of two years.

The AIP of Russia also has the Certification Commission (formed by the General Meeting every two years), the Industrial Construction Committee, the Warehouse Committee and the Working Group on Legislation.

PERSONAL ACCOUNT ON AIP OF RUSSIA WEBSITE

When joining the AIP of Russia, new members receive an individual login and password to access their personal account on www.indparks.ru

When authorised on the website through a personal account, the Association members receive the following:

- 1) Access to all requests submitted to the Association from investors, indicating their current status. All existing requests are also sent to AIP members by one-time email;
- 2) Possibility to post their own news on the website of the Association of Industrial Parks in the "Industry News" section with subsequent publication in the AIP weekly monitoring;
- 3) Access to the industry regulatory framework and the Association's documents;
- 4) Access to all analytical materials and electronic publications of the Association;
- 5) Possibility to update their organisation's profile on the Association website.

AIP OF RUSSIA MEMBERSHIP CONDITIONS

The Association is financed by contributions from its members and through voluntary property contributions and donations.

The entrance fee is 150,000 roubles payable upon entry and includes the membership fee for the first year. From the second year of membership in the Association, the annual membership fee is paid in the entry month, which is also 150,000 roubles.

For membership issues, please contact the AIP of Russia executive directorate at:

gr@indparks.ru, +7 495 517 45 68

www.indparks.ru

Publications of the AIP of Russia in 2018

GUIDE ON CONNECTIONS TO UTILITY SYSTEMS IN RUSSIA 2018

The new printed edition Guide on Connections to Utility Systems prepared by Noerr with the active participation and support of Bilfinger Tebodin. Contains procedures for connection to the main utilities - gas, electricity and water supply/water disposal. Offered as a general guideline without details of individual regions.

BROCHURE OF THE AIP INDUSTRIAL CONSTRUCTION COMMITTEE 2018

An updated electronic version of the profiles catalogue for the AIP member companies integrated into the Industrial Construction Committee. The presented companies are able to provide comprehensive services of building industrial plants, including the functions of project management and construction supervision, general contractor and technical customer, as well as certain special services.

INFORMATION SUPPORT OF AIP MEMBERS

WEEKLY OVERVIEW OF INVESTMENT ACTIVITIES IN RUSSIA

An information product containing publicly announced investment plans and intentions of production companies for localisation in Russia, and contact details of investment project initiators. Since 2017, the material has consisted of two parts. The first part presents requests to the AIP from investors for locating production in industrial parks of Russia. The second part demonstrates the achievements of industrial parks, where we see a complete picture of investors who have come to industrial parks and SEZ.

WEEKLY MONITORING OF UPDATES IN THE INDUSTRIAL PARKS AREA

The regular media monitoring that also includes the AIP members' updates and reflects the current situation in Russia as regards industrial parks, investment activity therein and long-term projects. The monitoring also includes announcements of events that the AIP recommends visiting.

All issues are available on the website through the Personal Account.

Certification of Industrial Parks

BACKGROUNDS

The Association of Industrial Parks (AIP) launched the first Russian voluntary certification system for industrial parks in February 2011. From 2011 through August 2015, the certification was performed to determine compliance with the industry standard of industrial (technology) park approved by AIP Board. Starting from 1 September 2015, the AIP launched certification under the Voluntary Certification System of the Association of Industrial Parks for compliance with the Russian National standard "Industrial Parks. Requirements" GOST R 56301–2014. It formalised the AIP industry certification system tested over the previous five years and the requirements to industrial parks developed by the industry actors. The rules of the new AIP Voluntary Certification System were registered by the Federal Agency on Technical Regulating and Metrology (Rosstandart) in the Unified Register of Voluntary Certification Systems on 10 August 2015 under Registration No. ROSS RU.M1370.04IAYA0. The document states that the Association of Industrial Parks acts as the Certification Body under the current legislation of the Russian Federation. In the period from September 2015 through March 2019, 36 industrial parks were successfully audited for compliance with the requirements of the National Standard.

PURPOSE

The purpose of certification is to provide reliable and structured data on an industrial park to the groups concerned, including potential investors, state authorities, finance institutions, as well as industry actors. Certificates are issued to operating industrial parks only. A certificate confirms that the corresponding industrial park complies with all the mandatory requirements of the Russian National Standard "Industrial Parks. Requirements" GOST R 56301–2014. The requirements established by the National Standard provide the basis for the current laws and regulations defining the criteria for industrial parks within the framework of the integrated support of industrial infrastructure development provided by the Ministry of Industry and Trade of the Russian Federation, the Ministry of Economic Development of the Russian Federation, as well as the Monotown Development Fund.

PROCEDURE

The certification process comprises several stages:

1. Completion of the Industrial Park Data Sheet.

To initiate the certification process, an industrial park data sheet should be completed. The electronic form of the data sheet is available at the website of the Association of Industrial Parks at: <http://www.indparks.ru/certification/apply/>. The completed data sheet must be emailed to Certification Director of the Association of Industrial Parks.

2. Completion of a Certification Request.

Following the approval of the completed data sheet, the concerned party must submit a certification application, sign a contract, and pay the certification fee.

3. Collection of a Package of Supporting Documents.

In order to prepare an application for the Certification Committee meeting, the concerned party must collect scanned copies of supporting documents specified in the industrial park data sheet and submit them to the Association of Industrial Parks electronically.

4. Inspection of the Industrial Park Site.

Following the receipt of the copies of supporting documents, AIP experts will visit the industrial park site to conduct an on-site inspection and check the original documents the copies of which have been submitted.

5. Certification Committee Meeting.

Following the finalisation of the application, the applicant will be invited to attend the Certification Committee meeting in order to present the industrial park to Committee members. The decision on compliance of the industrial park with the requirements of the National Standard is taken by majority vote.

RESULT

Following the Certification Committee meeting, the applicant will receive either a certificate of an operating industrial park or an expert report on non-compliance of the industrial park to the requirements of the National Standard. The data on the certified industrial park will be entered in the register of operating parks, while the information on successful certification will be published on the websites of AIP (www.indparks.ru) and of the Industrial Parks Geoinformation System (www.gisip.ru). The certification process takes 2 months on the average.

Research Methods

“Overview of Russian Industrial Parks 2019” has been prepared in accordance with the requirements of the Russian National Standard “Industrial Parks. Requirements” GOST R 56301–2014 approved by the Federal Agency on Technical Regulating and Metrology (Rosstandart).
The industrial parks presented in the “Overview” are divided into two groups:

- 1. Operating industrial parks**
industrial parks that possess all the mandatory attributes provided for by the Russian National Standard “Industrial Parks. Requirements” GOST R 56301–2014.
- 2. Designed industrial parks**
Industrial parks that do not possess one or several mandatory attributes set out in the Russian National Standard “Industrial Parks. Requirements” GOST R 56301 – 2014, but such attributes are provided for in the design documentation approved by the State expert appraisal body.

NATIONAL STANDARD OF INDUSTRIAL PARK

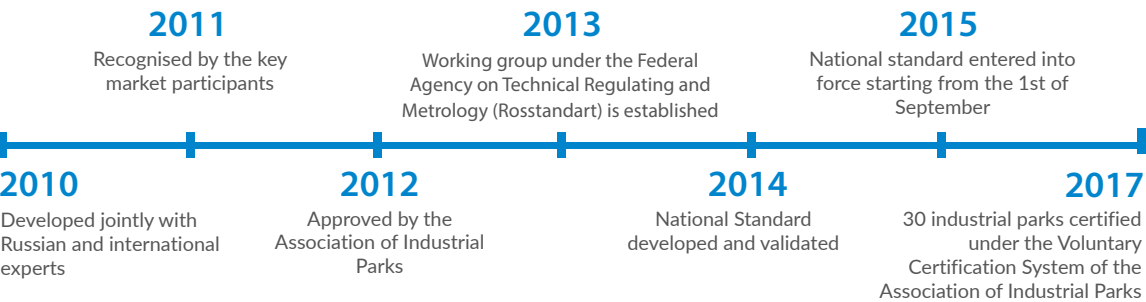

Key sections

-  Facility management company
-  Transport accessibility
-  Land plot
-  Utility infrastructure and power supply
-  Legal status of real estate
-  Business Plan and Master Plan

Области применения

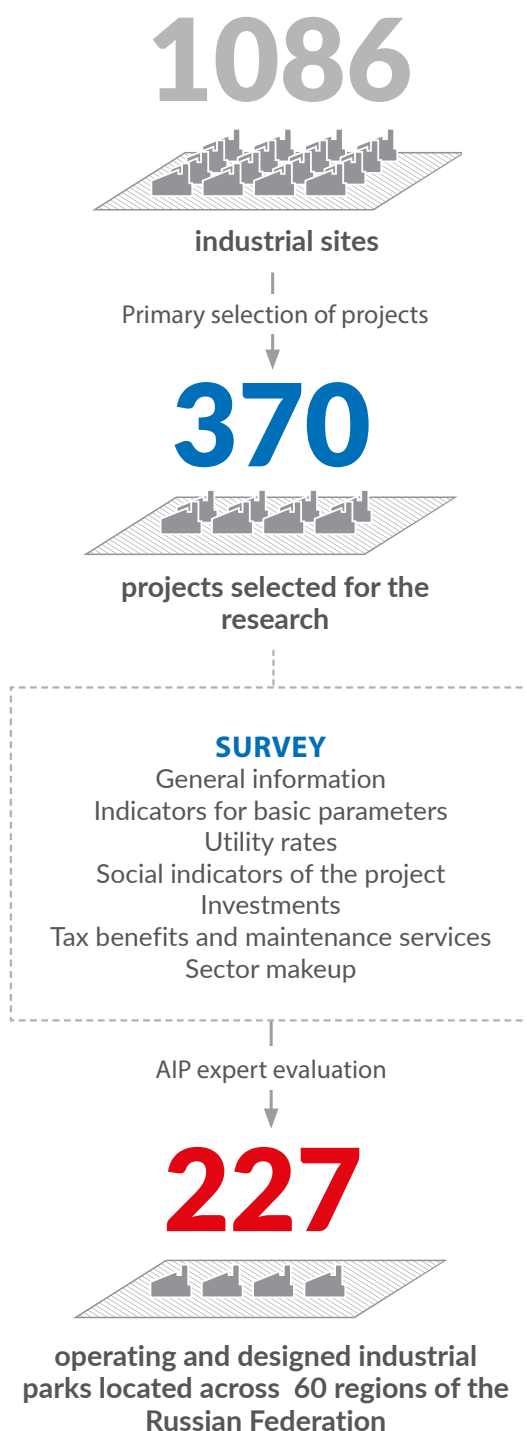

- 1** Industrial parks for maintaining quality standard
- 2** Investors as site selection tool
- 3** Investment banks for project evaluation
- 4** Authorities when choosing projects for government support

VOLUNTARY INDUSTRY STANDARD

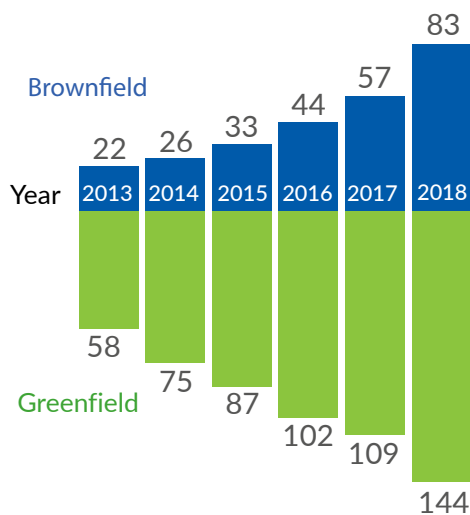

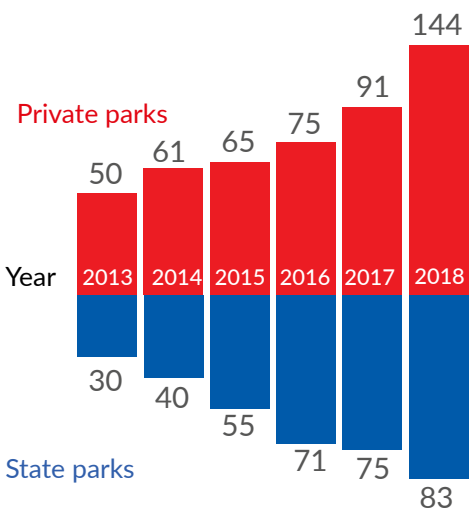

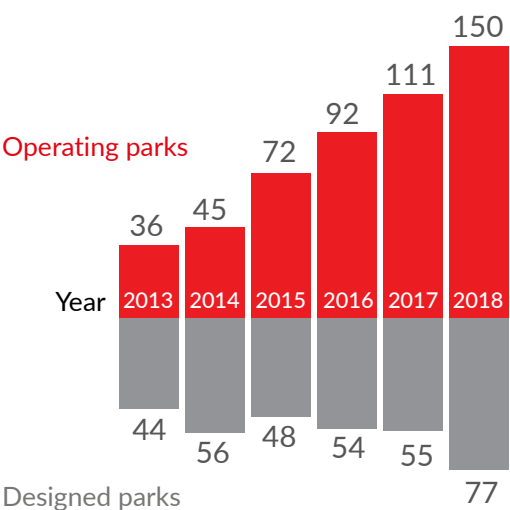

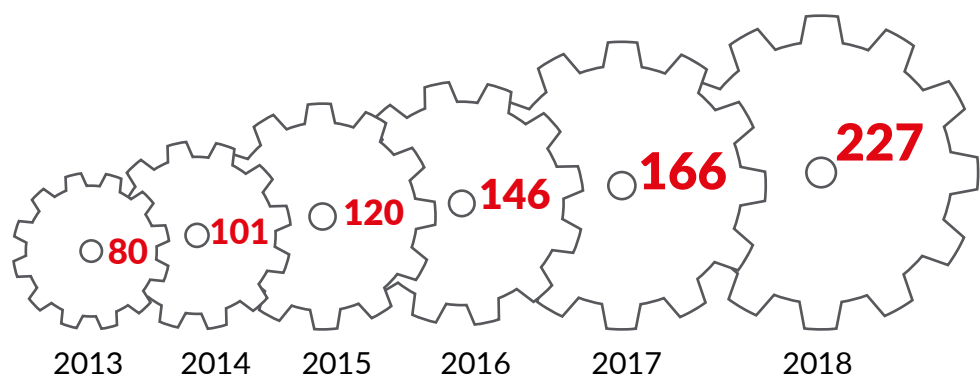

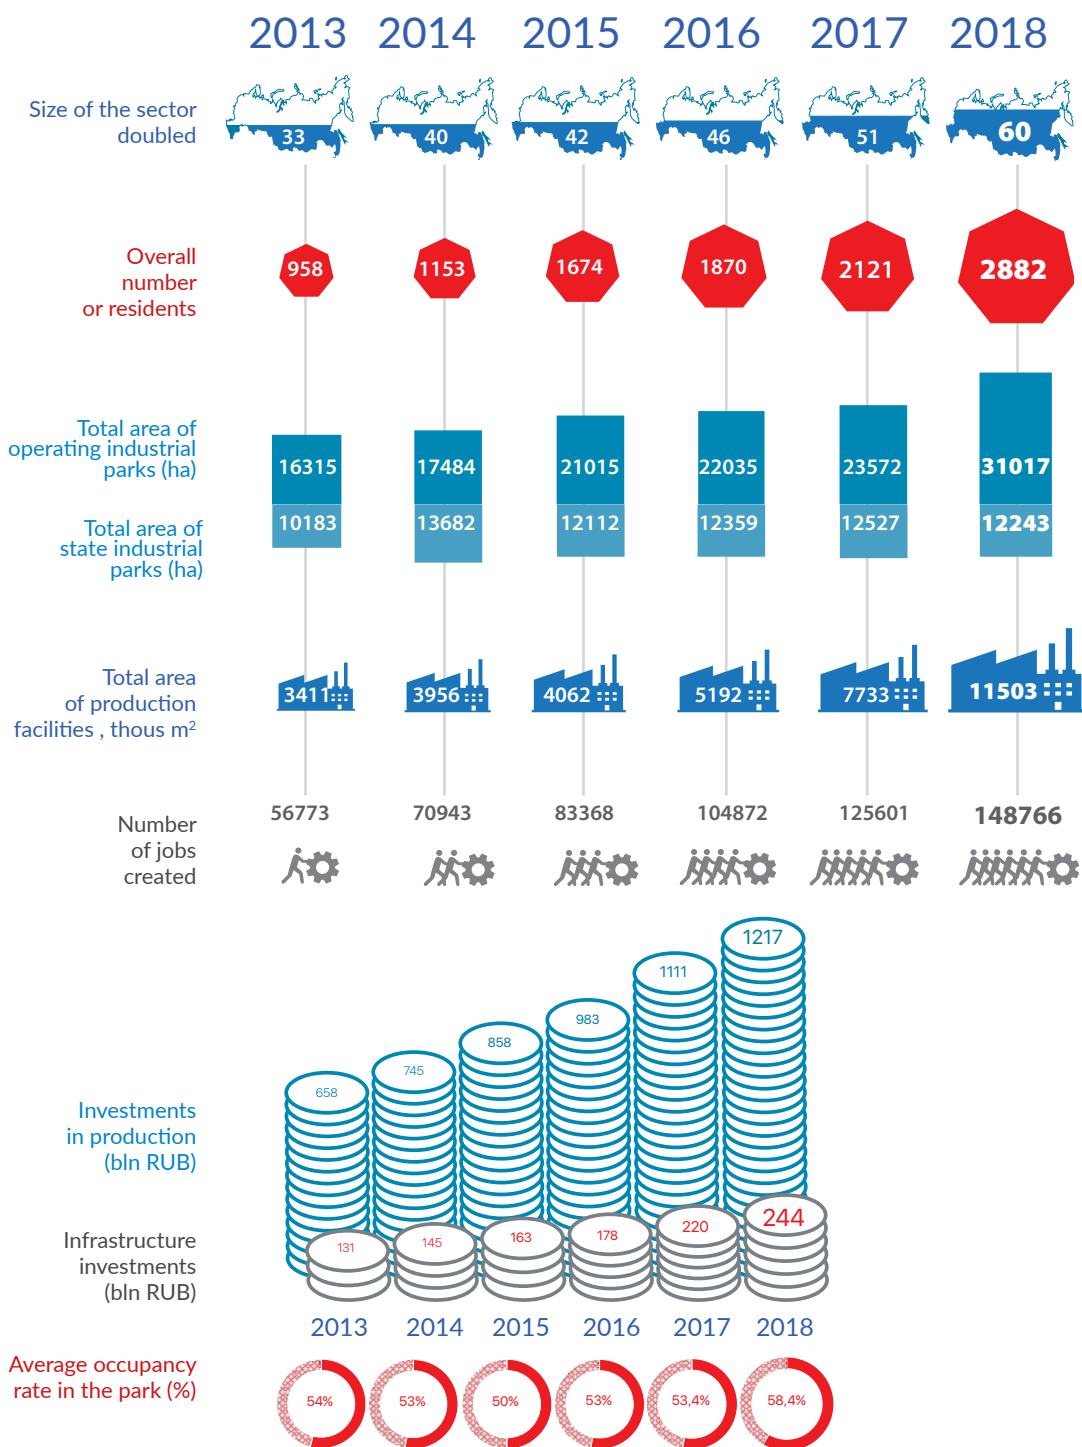

Research Procedure for the Industrial Parks Sector

During the research, general information on 1086 industrial platforms was collected. Primary analysis was used to select 370 projects pre-qualifying as industrial parks. 227 projects of industrial parks with current and projected indicators meeting the requirements of the National Standard were selected based on the research and expert evaluation.

INVESTMENTS IN INDUSTRIAL PARKS AND SEZ OF RUSSIA

Investments in industrial parks and SEZ, 1998-2018

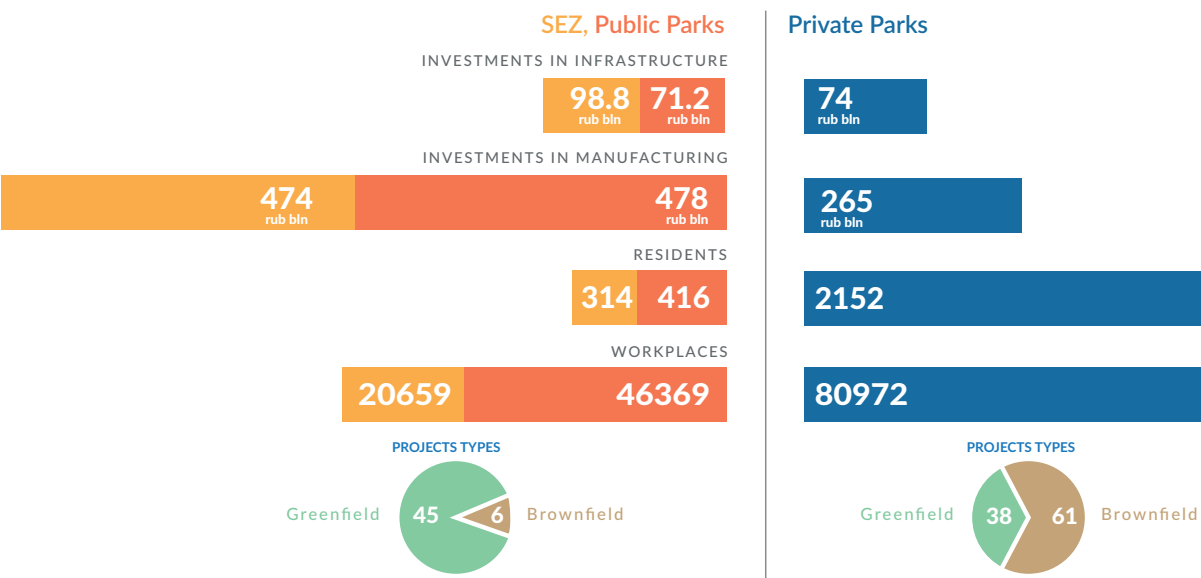

- 01 According to the data provided by 227 industrial parks and industrial and production SEZs, the total investment in the creation of new enterprises on the territory of these sites amounted to over RUB1,217 bln in 1998-2018.
- 02 Russian companies invested the maximum investment amount, 498 bln roubles, in the establishment of production. Other major investors included foreign companies from Germany, the USA, Japan and Turkey.
- 03 The trajectory of investment in production has been positive since 2014. In 2018, the investment amount was RUB106 bln.
- 04 Some 96% of all investment in production was made at the territory of 21 Russian regions. Some 70% of all investment was made in investment parks at the territory of the Kaluga Region, the Republic of Tatarstan, the Lipetsk, Moscow and Ulyanovsk regions.
- 05 In 2018, the key performance indicator for industrial parks and Industrial and Production SEZ amounted to 1:8: on average, RUB8 of investment in the establishment of production per RUB1 of investment in infrastructure.

Investments in greenfield sites and brownfield sites, 1998 - 2018

- 01 Greenfield parks are focused on placement of large and middle-sized companies with capital-intensive projects, Brownfield parks are home to middle-, small-sized and microenterprises, which in total create the number of jobs which is comparable with the one created by large companies.
- 02 The total investment in production in Greenfield parks is 20 times more than the one in Brownfield parks.
- 03 The ratio of attracted investments per 1 rouble of investments varies depending on the types of projects by 5 times, the average cost of creating a workplace varies by 21 times, the average cost of creating an enterprise varies by 32 times, but the average number of created jobs only differs by 1.8 times.

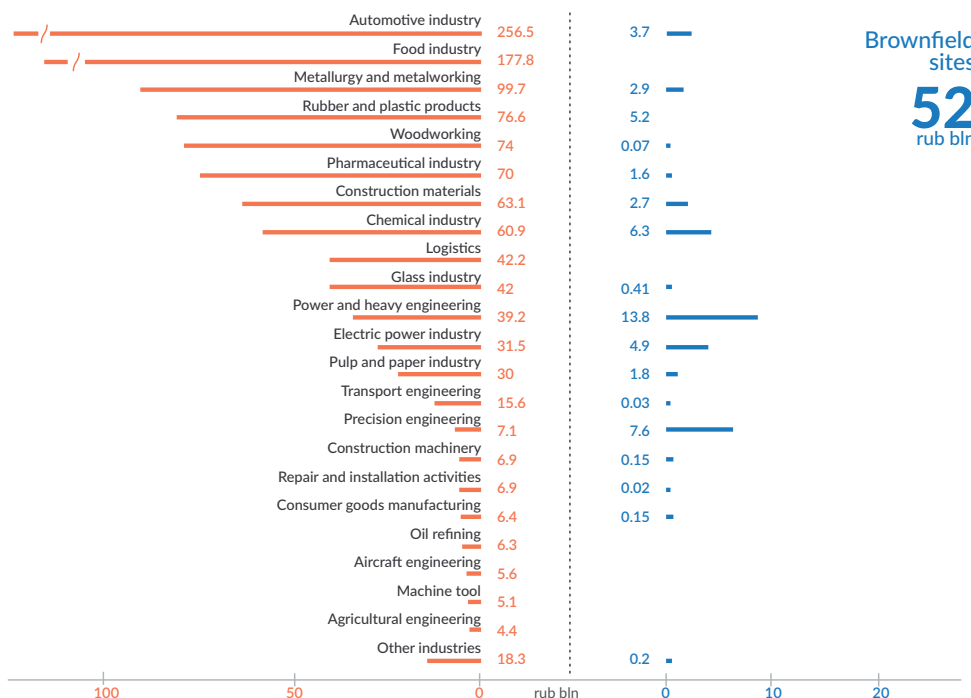

Investments in public and private industrial parks and SEZ, 1998-2018

- 01 The industry structure is characterised by the state sector dominance in Greenfield projects, while private companies prevail in Brownfield site management.
- 02 The state prevails in capital investment in industrial infrastructure: 2/3 of all investment have been made in the state-owned industrial parks and industrial and production SEZ.
- 03 Private industrial parks are home to 3/4 of all residents.
- 04 Private and state-owned industrial parks, as well as industrial and production SEZ demonstrate similar performance in attracting investments to production per RUB1 of investment in infrastructure.

Investments in industrial parks and SEZ, 1998-2018, by industry

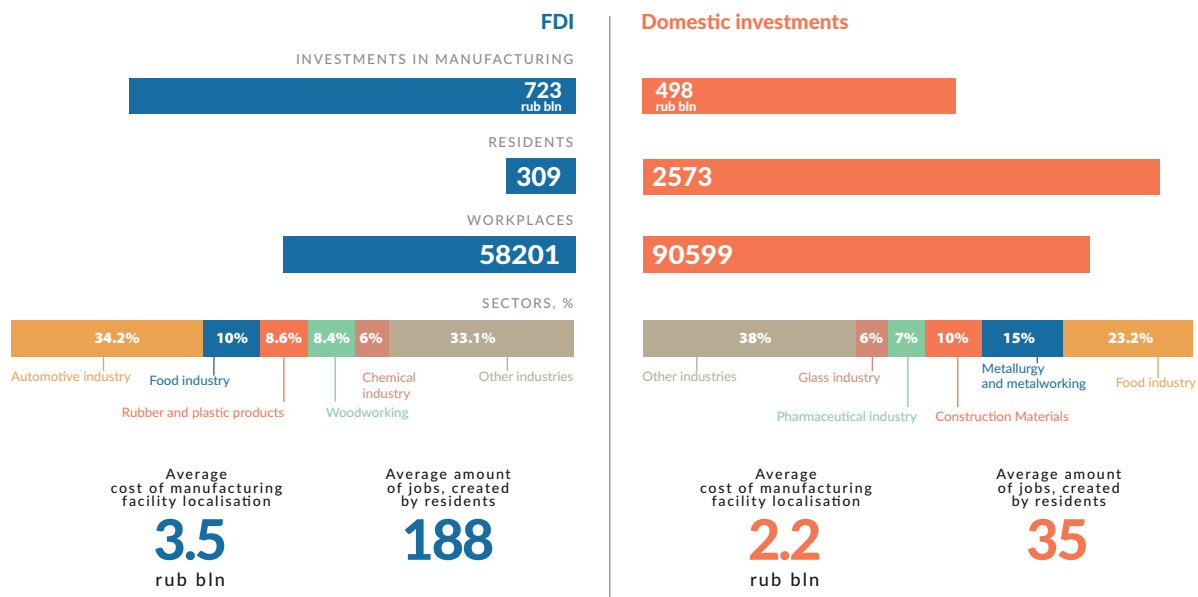

Greenfield sites
1165
rub bln

Brownfield sites
52
rub bln

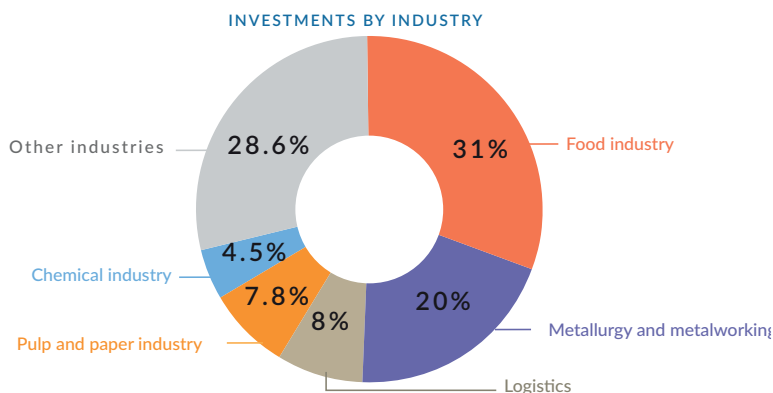

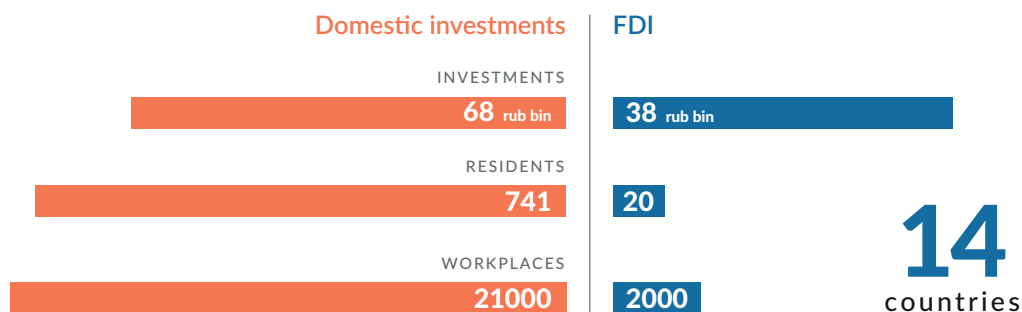

- 01 Industrial structures of Greenfield and Brownfield parks' residents differ both in industry types and the variety of industrial production types.
- 02 The automotive industry and the related tyre and plastic material production account for a third of the total investment. Food production and metallurgic companies operating with electric furnaces are another driver for investments in Greenfield parks.
- 03 Wood processing and pharmaceutical enterprises, as well as construction materials enterprises often become anchor residents or the enterprises that determine the specialisation of industrial parks.
- 04 Chemical industrial parks are the most vivid example of specialised Brownfield sites in Russia.

Investments in industrial parks and SEZ, 1998-2018, by industry

- 01 Total foreign investments account for 59% of the total investment in production.
- 02 The establishment of 300 large- and middle-sized enterprises in Greenfield parks accounted for 95% of the total foreign investment, which equals 15% of total residents.
- 03 The sectoral structure of foreign and Russian investments differs: investments in the automotive and food industry prevail among foreign companies; Russian companies have mostly invested in food industry enterprises, metallurgical production and the construction materials industry.
- 04 The average cost of creating an enterprise with the construction of an industrial facility is RUB2.5 billion.

Investments in industrial parks and SEZ in 2018

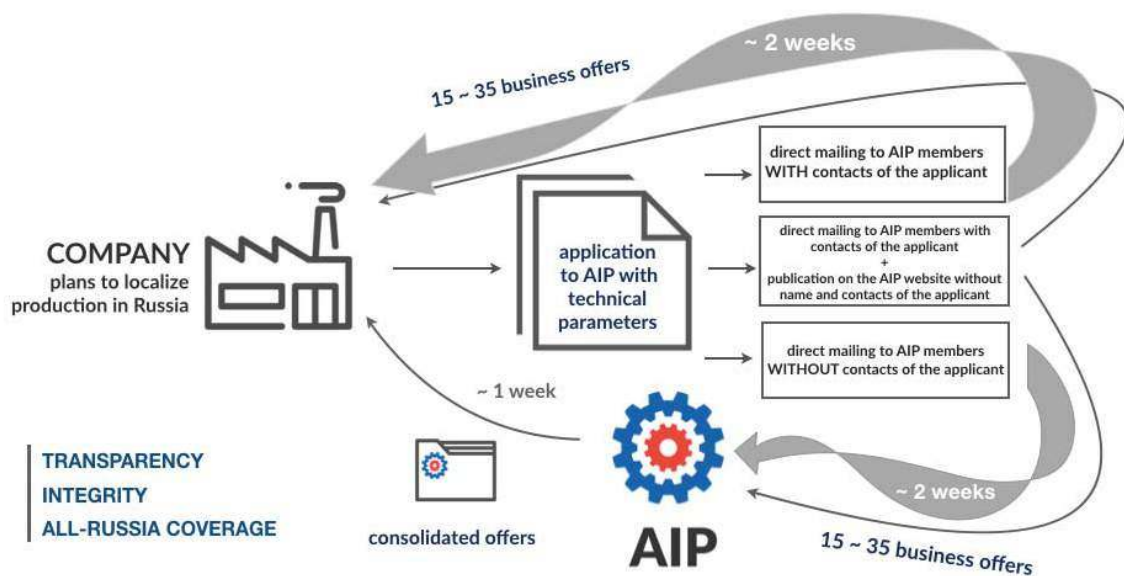

- 01 In 2018, Russian companies were the key investors in the localisation of enterprises 64% of the total investment.
- 02 Foreign companies from 14 states are represented by large and middle-sized enterprises.
- 03 In 2018, development drivers mainly involved companies related to food production, metallurgical and metal processing industry, the chemical and pulp and paper industries. In total, these industries account for 64% of the total investment.

AIP OF RUSSIA'S SERVICE FOR INVESTORS FROM RUSSIA AND THE WHOLE WORLD

SERVICE OF SELECTING PRODUCTION SITES AND SUPPLIERS/CONTRACTORS/COUNSELLORS

ALL INDUSTRIAL PARK OPTIONS

- industrial parks;
- special economic zones (SEZ);
- industrial land;
- completed production premises.

Localisation services:

- design and construction;
- project management;
- personnel and suppliers.

THREE WAYS TO FIND A SITE/SERVICE VIA OUR SERVICE:

- leave your contacts for us to get in touch with you;
- complete the project design parameters and get offers from across the entire country;
- use the search filter for selection on your own.

WE WILL PROVIDE:

- competent selection of an industrial site according to the technical parameters of your project;
- direct communication with AIP members;
- your anonymity, if necessary.

HOW WE WORK:

In an unbiased manner: the choice is made based on your parameters by comparing offers from all interested industrial parks nationwide. On a transparent basis: you get offers directly from industrial parks and region development corporations. Free of charge: we are not intermediaries or agents, our business is funded by the annual AIP members' contributions on a regular basis.
